

● السلسلة - Concatenation :

- هي دمج سلاسل Strings - متعددة في سلسلة String واحدة.
- مثال:

```
name = "Ali"
```

```
age = "22"
```

```
country = "Egypt"
```

```
result = "Welcom " + name + ". Your age is " + age +
```

```
". Your country is " + country
```

```
print(result )
```

```
#Welcom Ali. Your age is 22. Your country is Egypt
```
